

The following extract from Northstar Partners' 2025 Annual Report reviews two portfolio companies. The full Annual Report is published on the firm's investor relations website.

CIRRUS DATA SERVICES

Cirrus Data Services is a UK-headquartered managed services provider of mission-critical IT infrastructure to mid-market enterprises across the United Kingdom and Ireland. Northstar Partners invested in Cirrus in March 2022 through Northstar Partners Fund VI, acquiring a controlling interest from the Company's founders for an enterprise value of GBP 480 million.

Cirrus has performed strongly during our ownership. Revenue has grown from GBP 187 million at the time of our investment to GBP 312 million for the financial year ended 31 December 2025, representing a compound annual growth rate of 18.6 percent. Adjusted EBITDA has grown from GBP 41 million to GBP 78 million over the same period, with margins expanding from 21.9 percent to 25.0 percent. The growth has been driven by a combination of strong new logo addition, expanded scope with existing customers, and the successful integration of two acquisitions completed during 2023 and 2024.

The Company has continued to invest in product capabilities, particularly in cloud migration services and managed security services where customer demand is strongest. Cirrus employs approximately 940 people, up from 620 at the time of our investment, with the principal expansion in client-facing technical roles. Customer satisfaction metrics remain strong, with annual revenue retention of 108 percent reflecting both low gross churn and successful upsell activity.

Looking forward, we see continued growth opportunity for Cirrus in the UK and Irish mid-market, supported by structural demand for managed IT services as enterprises migrate to hybrid cloud architectures and address heightened cybersecurity requirements. The Company is well-positioned to continue gaining share, supported by a clear product roadmap and a high-quality management team. Cirrus is presented in our portfolio valuation at GBP 720 million, reflecting a 1.7 times multiple on invested capital and an unrealised IRR of approximately 19 percent over the three-and-a-half-year holding period to date.

MORENO IBERICA

Moreno Iberica is a Madrid-headquartered provider of branded specialty food products to the Spanish and Portuguese retail markets, with a particular focus on premium olive oil, cured meats, and ambient grocery products. Northstar Partners invested in Moreno in November 2021 through Northstar Partners Fund VI, acquiring the Company from a family seller for an enterprise value of EUR 285 million.

The Moreno Iberica investment has progressed more slowly than originally underwritten, reflecting both the more challenging Iberian consumer environment over the past two years and execution challenges in the planned expansion of the Company's own-label business. Revenue for the year ended 31 December 2025 was EUR 218 million, only modestly above the EUR 196 million at the time of our investment. EBITDA of EUR 31 million represented a margin of 14.2 percent, broadly stable over the holding period.

We have introduced several operational changes during 2025, including the recruitment of a new Chief Commercial Officer and the appointment of a new Chairman with deep Iberian consumer experience. We are also implementing a structured cost reduction programme targeting

approximately EUR 5 million of annualised savings. We expect these changes to begin contributing meaningfully in 2026.

The Moreno Iberica investment is presented in our portfolio valuation at EUR 245 million, reflecting a slight write-down from cost. We continue to view the underlying business as fundamentally sound and well-positioned for recovery as the operational programme takes effect and as the Iberian consumer environment improves. However, the realisation timeline has lengthened from our original underwriting and we anticipate a hold period of seven to eight years from initial investment rather than the originally envisaged five to six years.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE

Northstar Partners' environmental, social and governance ("ESG") programme has continued to mature during 2025. Eighty-five percent of our portfolio companies now report Scope 1 and Scope 2 emissions on a comparable basis, up from 72 percent in 2024. Twelve portfolio companies have committed to Science-Based Targets initiative ("SBTi") validation, with eight of these now having received SBTi approval.

Female representation in senior management across the portfolio reached 31 percent at the end of 2025, up from 26 percent at the end of 2024. This is below our 2027 target of 40 percent but the trajectory is improving.

We continue to integrate ESG considerations into our investment process from sourcing through diligence and into post-investment value creation planning. We see ESG performance as both a values commitment and a meaningful contributor to long-term commercial performance.

FUND STATISTICS

As of 31 December 2025, Northstar Partners Fund VI is fully deployed across 14 portfolio company investments, of which 2 have been fully realised and 12 are actively held. The Fund's net IRR stands at 17.4 percent, with a net MOIC of 1.84 times and net DPI of 0.61 times.

The Northstar Partners platform overall manages approximately USD 78 billion in assets across private equity, infrastructure, and private credit strategies.
