

MERIDIAN CAPITAL — EUROPEAN INDUSTRIALS FUND IV

ANNUAL PORTFOLIO REVIEW

For the year ended 31 December 2025 Strictly confidential — for limited partners only

INTRODUCTION FROM THE FUND MANAGEMENT TEAM

We are pleased to present the 2025 Annual Portfolio Review for Meridian European Industrials Fund IV. This has been an exceptional year for the Fund, characterised by strong portfolio performance across the substantial majority of our investments, the successful realisation of NorTech Industries at outstanding economics, and meaningful progress on operational improvement initiatives at our remaining portfolio companies.

The Fund's net IRR as of 31 December 2025 stands at 19.7%, with a net MOIC of 2.13x and net DPI of 0.94x. The Fund is now fully deployed across nine investments, of which one (NorTech) has been fully realised and the remaining eight continue to be held actively. We anticipate two further realisations during 2026.

This Review provides an update on each of the remaining eight portfolio companies. We also include a section on environmental, social, and governance progress across the Fund.

PORTFOLIO COMPANY UPDATES

1. Helvetia Precision Components AG

Investment date: June 2025 Sector: Precision manufacturing Total Fund equity: EUR 480 million
Status: Active, year 1 of hold

Helvetia Precision Components ("HPC") was acquired in June 2025 in a transaction valuing the Company at EUR 1.15 billion. HPC manufactures complex precision machined components for the medical devices, aerospace, and semiconductor end markets. Six months post-close, the Company is tracking modestly ahead of our underwriting on both revenue and EBITDA, with strong early traction on procurement programmes and the leadership transition proceeding well.

Two issues have emerged that we are managing actively: a slowdown in semiconductor capital equipment orders affecting one revenue segment, and a quality issue at a second-tier medical device customer that is being addressed through a corrective action programme. Neither is material to our overall investment thesis.

A full transaction memo is being prepared for the upcoming LP Advisory Committee meeting.

2. Lumen Specialty Chemicals GmbH

Investment date: October 2025 Sector: Specialty chemicals Total Fund equity: EUR 340 million
Status: Active, year 1 of hold

Lumen Specialty Chemicals was acquired in October 2025 in a transaction first announced in June. The Company is a leading European producer of high-purity specialty chemicals for the electronics, pharmaceutical, and advanced materials industries.

The integration into the Fund's portfolio is proceeding well. The 100-day plan is on track, with the new financial reporting infrastructure substantially in place and the procurement initiative beginning to deliver early wins. The Company's exposure to the semiconductor capital equipment cycle has been the principal area of operating focus, but underlying customer demand has held up

better than feared.

3. Brightway Industrial Coatings Ltd

Investment date: November 2022 Sector: Industrial coatings Total Fund equity: EUR 285 million
Status: Active, year 3 of hold

Brightway has had a strong 2025, with revenue growing 14% year-on-year and EBITDA growing 21%. The two acquisitions completed in 2024 (PaintTech Belgium and Ferromax Polska) have been substantially integrated, contributing approximately EUR 35 million of annualised revenue and significant synergy capture.

The Company's value creation plan is now in its execution phase rather than its planning phase, and we expect 2026 to be a strong year operationally. We have begun preliminary conversations regarding a potential exit in late 2026 or early 2027, although no formal process has been launched.

4. Continental Plastics Holdings

Investment date: March 2023 Sector: Specialty plastics Total Fund equity: EUR 220 million
Status: Active, year 3 of hold

Continental Plastics has had a more challenging 2025. Revenue grew 4% year-on-year (against an underwriting of 9%) and EBITDA was broadly flat. The principal headwinds have been weaker automotive end-market demand (representing 38% of the Company's revenue) and elevated raw material input costs.

We have introduced operational changes during the year, including the replacement of the Chief Operating Officer and the launch of a structured cost reduction programme targeting EUR 22 million of annualised savings. Early progress on this programme is encouraging.

The Company remains a long-term high-quality asset but the realisation timeline has lengthened by approximately 12 months from our original underwriting. We do not anticipate impairment.

5. Eltex Power Systems AS

Investment date: July 2023 Sector: Electrical equipment Total Fund equity: EUR 195 million
Status: Active, year 2 of hold

Eltex Power Systems has performed strongly, benefiting from substantial increases in European power infrastructure investment. Revenue grew 23% year-on-year and EBITDA grew 31%. The order backlog stands at EUR 480 million, up from EUR 285 million at our acquisition date.

We have funded EUR 38 million of additional capex during 2025 to expand manufacturing capacity, which has been comfortably absorbed by demand. The Company is one of the strongest performers in the portfolio and we anticipate strong realisation economics when we exit.

6. Voltgrid Solutions GmbH

Investment date: January 2024 Sector: Energy efficiency software and services Total Fund equity: EUR 165 million
Status: Active, year 2 of hold

Voltgrid Solutions provides energy efficiency software and consulting services to large industrial customers. The Company is performing in line with our underwriting, with annual recurring revenue growth of 28% and good progression on EBITDA margin. The Company has won three significant new contracts during 2025 with European industrial customers.

7. Drift Logistics Group BV

Investment date: April 2024 Sector: Third-party logistics Total Fund equity: EUR 240 million

Status: Active, year 2 of hold

Drift Logistics had a mixed 2025. The European parcel volume environment has been softer than expected, with overall European parcel volumes down approximately 3% year-on-year. The Company has nevertheless gained share, with revenue growing 6% against the negative market backdrop. EBITDA margins have been pressured by overcapacity in the market and have compressed from 14% to 12% year-on-year.

We continue to view Drift as a high-quality strategic asset, but the macroeconomic environment for European parcel logistics is challenging and we expect 2026 to remain difficult. We are managing the Company conservatively in terms of capex and additional capacity.

8. AustralPharma Group SA

Investment date: September 2024 Sector: Pharmaceutical contract manufacturing Total Fund equity: EUR 380 million Status: Active, year 1 of hold

AustralPharma Group, our specialty pharmaceutical contract manufacturer, has had a strong first year. Revenue grew 18% year-on-year, with particular strength from biologics manufacturing customers. The expansion of the Madrid facility (announced at acquisition) is on track for commissioning in mid-2026, on schedule and approximately 8% below budget.

REALISATIONS DURING THE YEAR

NorTech Industries AB. The realisation of NorTech Industries closed on 19 January 2026 (post year-end, but discussed here given its significance to the Fund). The exit generated gross proceeds of SEK 12.8 billion to Fund IV on invested capital of SEK 3.6 billion, representing a 3.56x gross MOIC and 31.4% gross IRR. NorTech becomes the largest single realisation in Fund IV's history.

ESG PROGRESS

ESG performance across the portfolio has continued to improve through 2025. All eight portfolio companies have now completed Science-Based Targets initiative submissions or are in the final stages of doing so. Scope 1 and Scope 2 emissions across the portfolio reduced by 8% on an absolute basis during 2025, despite revenue growth across the portfolio of approximately 12%. Scope 3 reporting continues to be a priority area for improvement.

Employee engagement scores improved at six of the eight portfolio companies, with two companies (Brightway and Eltex) achieving employee engagement scores in the top decile for their respective sectors.

Female representation in senior leadership across the portfolio reached 34% by the end of 2025, up from 28% at the start of the year and from 22% at Fund inception. This compares with a Fund-wide target of 40% by 2027.

FUND METRICS

As of 31 December 2025: - Net IRR: 19.7% - Net MOIC: 2.13x - Net DPI: 0.94x - Net TVPI: 2.13x - Investments: 9 (1 realised, 8 active) - Total invested: EUR 2.51 billion - Total committed: EUR 2.80 billion - Total realised proceeds: EUR 1.13 billion - Estimated unrealised value: EUR 4.21

billion

LOOKING FORWARD

We anticipate two additional realisations during 2026, with Brightway Industrial Coatings and Eltex Power Systems both progressing toward exit-readiness. We will provide further updates as these processes develop.

We are grateful for your partnership and continued support.

Henrik Vossberg, Partner Caroline Achterberg, Partner Meridian European Industrials Fund IV
